

# The Chieveley

## Wireless Door Control

The Chieveley is a secure wireless door entry control system with an operating range of up to **1,000 metres** (in open space) typically used for remote switching of doors, gates and barriers—*without using a key*.

The Chieveley does not need a change of lock, it is easily connected directly to any new or existing Electric Latch Release

Durable and dependable the Chieveley uses a secure encrypted “rolling-code” that changes with every use to ensure complete system integrity and security.

Ideally suited for Doors, Car Park Barriers, Gates, Schools, Hotels, Offices, Nursing Homes, Local Authorities, Social Services, Care Homes, Warden Assisted Accommodation, Apartment Blocks and Disabled Persons Access.

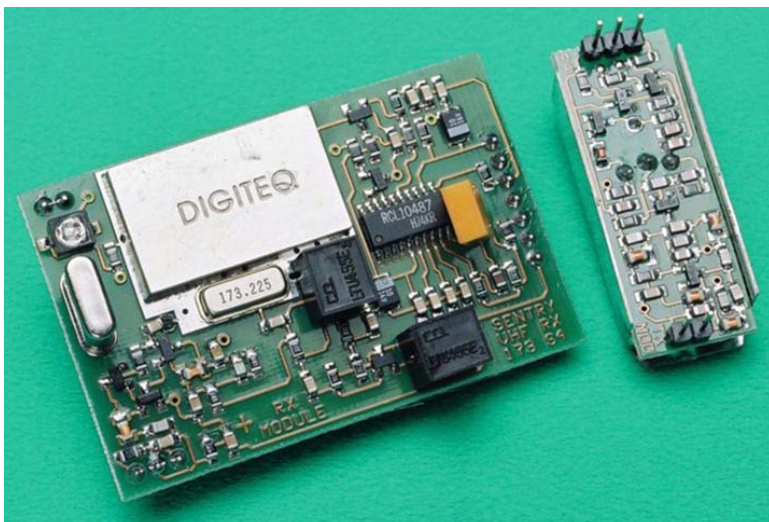

The Chieveley requires NO training and NO technical knowledge to install

Designed to be user friendly the Chieveley system requires no technical knowledge to get started.

- To install The Chieveley, you will need to connect two wires from the controller to the latch release.
- Plug in the standard 12V power supply adapter supplied with the kit directly into the mains.
- To programme The Chieveley, either add or delete a user, a few very basic steps need to be followed as described in the “User Guide”

Within minutes of the system being installed, it can be programmed and ready for use by up to a maximum 999 users—*provided they have each been added to the system !!*
