

**VERIFICATION ID. ( 1 )**

- Digital Keypad
- RFID Proximity
- Biometric
- Video Recognition / CCTV
- Swipe Card
- Voice

Digital verification to identify the individual is necessary so that the Building Management / Door Control system (5) can validate and authorise entry into the property being protected. This can be done using a single or combination of various available technologies.

The standards within these verification technologies can vary to suit the level of security required by the project

When the identification has been approved a signal is sent by the validation system to the door release device.

**VALIDATION SYSTEM ( 2 )**

- Access Control  
TDSi  
Paxton  
PAC  
TaylorSmart  
..... Etc.
- Building Management  
Honeywell  
..... Etc.

**DOOR RELEASE DEVICE**

Request to Exit button ( 3 )

Latch Release ( 4 )

or

**Taylor 500 Electric Mortice Lock ( 4 )**
